JOURNAL OF APPLIED ELECTROCHEMISTRY 17 (1987) 1327–1332

Indexes to Volume 17 (1987)

The subject index has been organized into topics for easy reference.

Subject Index

Electrochemical analysis, instruments and properties

Analysis of the inductance influence on the measured electrochemical impedance, 1150
Conductivity measurements of electrodeposited polypyrrole, 1198
Impedance analysis of electrodes modified with a reversible redox polymer film, 82
Impedances de cellules de conductivite. II. Utilisation du dioxyde de ruthenium comme materiau d'electrodes, 695
Measurements of electrochemical impedance on the alloy Al 2024T3: an analysis of parameters used to predict the quality of the anodic film, 641
Potentiometric measurements of ionic transport parameters in poly(ethylene oxide)-LiX electrodes, 625
Response of solid-state ion-selective electrodes to quaternary ammonium ions, 219
Transport studies on thin films of $Ag_7I_4VO_4$ solid electrolyte, 813

Electrochemical engineering

Approximate evaluation of cell resistance with resistive electrodes, 552
Current distribution in a two-dimensional narrow gap cell composed of a gas evolving electrode with an open part, 67
Mathematical model for non-ideal tank electrolysers, A, 57
Modelling of tank electrolysers via Markov chains, 841
Performance of a pressurized electrochemical ozone generator, 773
Pumping effect due to gas evolution in flow-through electrolysers, 134
Reactor analysis of series and parallel electrochemical reactions during galvanostatic operation, 925
Simulation and optimization of a packed bipolar cell by means of a combination of conducting paper and an electrical model circuit, 113
Simulation of a packed bipolar cell involving cathodic limiting current and anodic Tafel behaviour, 877
Simulations of an extractive electrochemical reaction under limiting current conditions in a parallel-plate reactor, 480
Variations of cell resistance and current distribution with current feeder configurations, 445
Voidage problem in gas-electrolyte dispersions, The, 419

Electrochemical mass transfer

Effect of drag-reducing polymer on the rate of mass transfer in fixed-bed reactors, 583
Electrokinetic dewatering and thickening. III. Electrokinetic cells and their application to a range of materials, 1171
Enhanced mass transfer using roughened rotating cylinder electrodes in turbulent flow, 370
Mass transfer at gas-evolving vertical electrodes, 1177
Mass transfer at packed-bed, gas-evolving electrodes, 746
Mass transfer at rough surfaces: reconsideration of data reported by Sedahmed *et al.*, 434
Mass transfer downstream of nozzles in turbulent pipe flow with varying Schmidt number, 1118
Mass transfer in electrolytic cells with gas stirring, 340
Parameter characterizing the geometry of expanded metal. I. A general mass transfer correlation for flow-by electrodes of expanded metal and wire cloth, A, 123
Parameter characterizing the geometry of expanded metal. II. Natural convection mass transfer at expanded metal electrodes, A, 127

Electrochemical thermodynamics

Potential-pH diagrams for complex systems, 1

Redetermination of the standard potential of the mercuric oxide electrode at temperatures between 283 and 363 K and the solubility product constant of mercuric hydroxide, 505

Electrochromic phenomena

Electrochromic properties of alkylviologen-cyclodextrin systems, 567

Electrode kinetics, catalysis

Anodic characteristics of amorphous nickel-valve metal alloys containing small amounts of platinum group elements in 0.5 m NaCl, 347
Electrochemical behaviour of copper in aqueous solution containing potassium ethylxanthate, 779
Electrochemical behaviour of Cu–Zn–Al oxide catalysts in $DMSO_2$ at 150° C, 760
Electrochemical surface properties of Co_3O_4 electrodes, 828
Evaluation of electroactive intermediate states in anodic O_2 evolution at chemically formed nickel oxide: comparison with behaviour at nickel metal anodes, 983
Kinetics of the dissolution behaviour of anodic oxide films on niobium in NaOH solutions, 559
Mechanism of cathodic $PtCl^{2-}$ reduction to platinum clusters on electrodes coated with polyvinylpyridinium films, 1246
Mono- and multilayer formation studies of silver chloride on silver electrodes from chloride-containing solutions, 635
Mono- and multilayer formation studies of silver iodide on silver electrode from iodide-containing solutions, 997
On mechanistic differences in methanol oxidation in basic medium induced by the activation of gold electrodes, 868
Oxygen evolution reaction on thermally treated iridium oxide films, 737
Potentiodynamic behaviour of aluminium in propanedioic acid solutions, 807
Recirculating feed operation of bipolar packed-bed and trickle-bed electrode cells equipped with mesh spacers, 724
Ruthenium dioxide as a hydrogen-evolving cathode, 1190
State of overpotential-deposited H species at electroplated platinum surfaces in comparison with bright platinum, 1002
Triangular potential sweep voltammetric study of porous iron electrodes in alkali solutions, 1083

Electrokinetics

Electrokinetic dewatering and thickening. I. Introduction and historical review of electrokinetic applications, 889
Electrokinetic dewatering and thickening. II. Thickening and ball clay, 1048
Electrokinetic dewatering and thickening. III. Electrokinetic cells and their application to a range of materials, 1171

Electrosynthesis

Anodic oxidation of O-toluenesulphonamide to saccharine on a NiO(OH)-coated nickel, anode, 1228
Chromium–titanium–antimony oxide composite anodes: electro-organic oxidations, 914
Current efficiency losses in indirect electrochemical processing, 1315
Electrochemical approach to the recycling of nitration waste concentrated sulphuric acid, 731
Electrochemical polymerization of thionaphthene–indole, 1111
Electrolytic oxidation of cuprocyanide electroplating waste waters under different pH conditions, 684
Electro-oxidation rate of p-tert-butyltoluene in a bipolar packed-bed electrode cell, 1213
Electrosynthesis in systems of two immiscible liquids and a phase transfer catalyst. VII. The chorination of substituted naphthalenes, 905
Electrosynthesis of organic compounds. XI. Synthesis of some arylmalononitrile derivatives, 881
Electrosynthesis of propylene oxide in a bipolar trickle-bed reactor, 532
Hypochlorite production. I. A model of the cathodic reactions, 77
Influence of electrode structure on the adsorption and electro-oxidation of ethylene on platinum, The, 147
Insoluble anode of pourous lead dioxide for electrosynthesis: preparation and characterization, 22
Kinetics and mechanism of anodic oxidation of chlorate ion to perchlorate ion on lead dioxide electrodes, 33
Kinetics of the Mn(III)-mediated electrochemical synthesis of sorbic acid precursors from acetic acid and butadiene, 398
Oxygen electroreduction in perfluorinated sulphonyl imides, 1057
Paired electro-oxidation. I. Production of benzaldehyde, 753
Selectivity characteristics of the electrohydrodimerization of acrylonitrile, 329
Use of gas-diffusion electrodes for high-rate electrochemical reduction of carbon dioxide. I. Reduction at lead, indium- and tin-impregnated electrodes, 1159

Use of gas-diffusion electrodes for high-rate electrochemical reduction of carbon dioxide. II. Reduction at metal phthalocyanine-impregnated electrodes, 1223

Energy conversion, power sources

'Breathing' of the lead–acid battery negative plate during cycling, 715
Choked two-phase flow during electrochemical machining, 1304
Comparative e.m.f. study of CaF_2 and β-alumina cells with Ni-NiF_2 and Fe/FeF_2 or Cr/CrF_2 electrodes, 949
Cyclic voltammetry test for the effectiveness of cathode additives in the sodium–sulphur battery, 437
Dual electrolyte–semiconductor contact CdSe electrochemical photocell, 1100
Effects of additives on the suspension of products of discharge of zinc in alkaline solution, 1296
Electrochemical behaviour of polypyrrole films as secondary battery electrodes in $LiClO_4$–propylene carbonate, 215
Gas phase relations for protonic solid-electrolyte fuel cells, 545
Hexacyanoferrate layers as electrodes for secondary cells, 653
High performance carbon electrodes for acid methonal–air fuel cells, 413
Influence of methylcellulose-coated paper separators on the corrosion, polarization and impedance characteristics of zinc in concentrated ammonium chloride solution. I. Behaviour in flooded electrolyte, 1021
Influence of methylcellulose-coated paper separators on the corrosion, polarization and impedance characteristics of zinc in concentrated ammonium chloride solution. II. Comparison of data obtained in flooded electrolyte and battery environments, 1037
Influence of the size of $PbSO_4$ crystals on their solubility and the significance of this process in the lead–acid battery, 1075
Influence of various coated paper separator materials on the corrosion, polarization and impedance characteristics of zinc in concentrated sodium chloride solution, 1281
Impedance of alkaline manganese cells and their relationship to cell performance. I. Interpretation of the basic impedance spectrum, The, 165
Impedance of alkaline manganese cells and their relationship to cell performance. II. Correlation with short-circuit current and initial pulse discharge behaviour, The, 174
Impedance of alkaline manganese cells and their relationship to cell performance. III. Correlation with high-rate discharge capacity, The, 185
Lithium secondary cells using LiX (X = ClC_4, BF_4) as electrolyte and poly(2,5-pyrrolylene) and poly(2,5-thienylene) as materials for positive electrodes, 607
Long-term performance of carbon gas-diffusion air electrodes in saline electrolyte, 657
Low-temperature charging behaviour of lead–acid cells, 789
On the behaviour of carbon black in positive lead–acid battery electrodes, 473
Open circuit voltage recovery of discharge and shortened nickel–cadmium cells, 463
Passivation of porous carbon cathodes in lithium–thionyl chloride cells, 702
Studies of Zn/ZnX_2/polyaniline batteries. I. X = Cl and Br, 515
Textural and structural studies on nickel hydroxide electrodes. II. Turbostriatic nickel(II) hydroxide submitted to electrochemical redox cycling, 589

Miscellaneous

Traitement anodique de suspensions de poudre de graphite sur des electrodes de metal deploye, 965

Metal deposition, surface finishing

Anodic levelling of model profiles with pulsating current, 1144
Characteristics and properties of electrodeposited chromium from aqueous solutions, 303
Chemistry and electrochemistry associated with the electroplating of group VIA transition metals, The, 225
Effect of an organic additive on the electrocrystallization of cadmium in alkaline solution, 427
Electrodeposition of catalytically active Co–Ni–Ti alloy powders from dilute sulphate baths, 956
Electrodeposition of Cd–Ni alloys from acetate baths using a superimposed alternating current, 667
Electrodeposition of zinc-nickel alloys from chloride solutions, 574
Electroplating of antimony and antimony-tin alloys, 156
Electroplating of bright cadmium from an optimized acetate bath under the influence of superimposed alternating current, 49

Electropolishing of chromium in phosphoric acid–sulphuric acid electrolytes, 205
Hetero-epitaxial growth of zinc electrodeposits on low-carbon steel sheets, 821
Mechanism of electroless metal plating. III. Mixed potential theory and the interdependance of partial reactions, 1254
Mechanisms of copper–nickel alloy electrodeposition, 1267
New bath for the electrodeposition of aluminium. II. Kinetics and mechanism of the deposition and dissolution processes, A, 357
Nucleation and growth of zinc electrodeposited from acidic zinc solutions, 765
On the electroplating of laminated chromium, 315
Preparation of high-purity antimony by electrodeposition, 936
Reverse pulse plating of copper from acid electrolyte: a rotating ring disc electrode study, 977
Role of 2-thiouracil as addition agent during the electrodeposition of copper on copper(III) plane, 649
Zinc electrodeposit morphology under conditions of fluctuating current density, 91

Mineral electrochemistry, hydrometallurgy

Electrochemical phenomena in aqueous electrowinning of lead, 1234
Electrowinning of cobalt from a sulphate bath containing H_3BO_3 and NaF, 675
Identification of optimum conditions for zinc electrowinning in high-purity synthetic electrodes, 453
Utilization of gas-diffusion electrodes catalysed with tungsten carbide as anodes for zinc electrowinning, 322

Molten salt systems

Controlled nucleation and growth in chromium electroplating from molten LiCl–KCl, 270
Corrosion and deposition performance of molten salt electrodeposited chromium coatings, The, 283
Double-layer capacitance and polarization potential of baked carbon anodes in cryolite-alumina melts, 1203
Electrochemical studies of the reaction between titanium metal and titanium ions in the KCl–NaCl molten salt system at 973 K, 849
Electrochemical study of aluminium ion reduction in acidic $AlCl_3$-n-butyl pyridinium chloride melts, 857
Electrochemical study of mass transfer in Li–Mg and Li–Mg–Al alloys, 385
Electroplating silicon and titanium in molten fluoride media, 294
Etude de la reaction de reduction electrochimique de l'aluminium dans les melanges de chlorures alcalins et de chlorures-fluorures alcalins fondus a 450° C, 941
Formation of corrosion-resistant layers by electrodeposition of refractory metals or by alloy electrowinning in molten fluorides, 261
Formation of metal fog during molten salt electrolysis observed in a see-through cell, 707

Salt state, oxide films

Anodization of molybdenum. I. Galvanostatic anodization, 1065
Anodization of molybdenum. II. Electrical breakdown, 899
Comparative study of the potentiodynamic behaviour of aluminium at low potentials in barrier layer and in pore-forming electrolytes, 104
Importance of electrode/zirconia interface morphology in high-temperature solid electrolyte cells, 800
Kinetics of anodic oxide film growth in alkaline solution, 196
Miniature oxygen pump-gauge. III. Application of a periodic current waveform, 489
On the electrodeposition and characterization of niobium from fused fluoride electrolytes, 253
Oxygen sensor based on the semiconducting properties of $(U_{0.3}Y_{0.7})O_{2-x}$, An, 495
Potentiostatic study of the electrochemical nucleation of oxide films on cadmium in alkaline solutions, 1093
